### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

**Amend claim 1 as below:**

An apparatus for supporting a thin, planar workpiece comprising;  
a plenum in fluid communication with a gas supply and comprising a workpiece support flange having an inner diameter slightly smaller than an outer diameter of the workpiece;  
an edge ring that movably rests on the support flange and contacts an outer edge of the workpiece and wherein the edge ring has an inner diameter slightly smaller than the outer diameter of the workpiece and an outer diameter slightly larger than an outer diameter of the workpiece and wherein when the workpiece is placed on the support flange an outer edge of the workpiece rests upon the edge ring; and

wherein when a workpiece is placed on the support flange and gas is supplied to the plenum the edge ring is lifted by the gas in contact with the outer edge of the workpiece such that the inner diameter of the support flange coacts with an outer diameter of the edge ring to define a gas flow path through which the supplied gas flows when the edge ring and the workpiece are lifted ~~from~~ off the support flange.

**Amend claim 8 as below:**

An apparatus for supporting a thin, planar workpiece comprising;  
a plenum in fluid communication with a gas supply and comprising a workpiece

support flange having an inner diameter slightly smaller than an outer diameter of the workpiece;

locating structure disposed about a periphery of the support flange that maintains the workpiece location with respect to the support flange;

a wafer edge ring that ~~moveably~~ movably rests on the workpiece support flange and is maintained in position by the locating structure, the edge ring comprising an inner diameter slightly smaller than the outer diameter of the workpiece and an outer diameter slightly larger than the outer diameter of the workpiece; and

wherein when a workpiece is placed on the edge ring and gas is supplied to the plenum the edge ring is lifted by the gas in contact with the outer edge of the workpiece such that the inner diameter of the support flange coacts with an outer diameter of the edge ring to define a gas flow path through which the supplied gas flows when the edge ring and the workpiece are lifted ~~from~~ off the support flange.

**Cancel withdrawn claims 11-13.**

Authorization for this examiner's amendment was given in a telephone interview with Ms. Jennifer Nock Hinton on 3/7/2006.

### **REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance: Claims 1 and 8 are allowable in view of the amendments and the clarification (by examiners amendment) that the edge ring lifts off the support flange to float over gas while supporting the workpiece.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
